

ALLEN JOSEPH

FULL-STACK DEVELOPER alenjoseph4115@gmail.com | [+91 97475 18522](tel:+919747518522)
github.com/iam-alenjoseph | linkedin.com/in/alen-joseph-a96b2537b | [Portfolio](#)

Full-stack Developer focused on shipping complete, working products end-to-end; comfortable owning a build from architecture through deployment across front-end interfaces and back-end logic.

EXPERIENCE

Full Stack Web Development Intern *VisionX IT Services*
Kozhikode, Kerala (On-site)

Jun 2026

- Working on **live client projects** as part of a full-stack development team, building responsive interfaces with React.js and Tailwind CSS under professional development workflows.

PROJECTS

Modern CV Builder

Independent Build 2026

Real-time resume builder with live preview and in-browser export.

- Built a **live-preview editor** where every field update renders instantly in a formatted resume layout, with no page reload or server round-trip.
- Designed the export path to produce a **polished, print-ready document** directly from the browser, removing the need for any external design tool.

STREAMIX

Independent Build 2025

Front-end prototype for a media streaming platform.

- Built the **browsing and playback interface** in JavaScript, exploring component architecture for a content-dense, high-navigation experience.

Biodata Maker

Independent Build 2025

Lightweight generator for formatted biodata documents.

- Built a **form-to-document pipeline** that takes simple structured input and outputs a fully formatted biodata document within seconds.

Personal Portfolio

Independent Build 2025

Deployed personal site built and maintained in TypeScript.

- Designed and shipped a **production-deployed** personal site featuring an animated hero section, a live project showcase, and direct resume access.

SKILLS

Languages: Python, Java, C++, C, JavaScript, TypeScript

Frontend: React, HTML5, CSS3, Tailwind CSS, Framer Motion, responsive design

Foundations: Data Structures, Algorithms, Object-Oriented Programming, Computer Organization

Tooling: Git, GitHub, VS Code, Vite

EDUCATION

Bachelor of Computer Applications (BCA)

2024 – Present

Noorul Islam Centre for Higher Education (Deemed to be University)

- Coursework spanning web development, UI/UX design, and project management, applied directly to independent, shipped projects.
